

About Us

Software Santa Fe, located in Santa Fe city, is a company that develops and produces software. It's the result of an incubation process that took place in Parque Tecnológico Litoral Centro (PTLC) between 2003 and 2004.

From the beginning, the company worked close to the technological and scientific university sector, particularly with the Universidad Tecnológica Nacional.

The company aim is to provide software solutions using cutting edge technology while directing efforts to build up synergistic relationships with clients with a a strong commitment with towards quality standards.

Software Santa Fe emphasizes team work, with highly qualified professionals and technicians who contribute with their efforts, knowledge and expertise to carry out the development of software products and services.

State-of-the-art technology and processes allow Software Santa Fe to provide clients with workable solutions for their problems. We work either on their premises or from our company integrating our human resources with our clients' teams. This 'modus operandi' has been welcomed with satisfaction on the regional as well as international markets.

We are firmly convinced that the combination of:

- 
- A stylized globe showing the continents in light blue and oceans in white. A purple dot is placed on the eastern coast of South America, specifically over Argentina, with a thin line extending from it towards the text.
- Well qualified human resources
 - Abroad outlook towards a comprehensive service
 - A commitment to positive results.
 - Implementation of processes of an international international quality model (CMMI ML2 Certified).

Enable us to offer cost effective, immediate solutions and services which reduce risk, increase productivity and lower cost

Mission
